NEW IN 2022

BACHELOR OF CLIMATE CHANGE

THE UNIVERSITY OF WAIKATO
Te Whare Wānanga o Waikato
Climate change is the most pressing environmental issue facing humanity and it needs people like you to develop the expertise necessary to affect meaningful change.

With a global reputation for cutting-edge research on environmental issues, the University of Waikato is ideally positioned to tackle this issue head-on and is proudly launching a new three-year degree in 2022 - the Bachelor of Climate Change*.

This new degree is the first of its kind in the world. It combines the underlying science of climate change with an understanding of economic and political systems, and how climate change might impact Māori, Pacific and Indigenous communities.

You will study papers across Science, Social Sciences, Māori and Indigenous studies, Management and the Arts. The challenges of climate change require people with a variety of expertise, so you can choose major subjects from across the University, including Ecology and Biodiversity, Economics, Environmental Sciences, Environmental Planning, Political Science and Māori and Indigenous Studies.

You will also have the opportunity to work with companies, iwi and community groups to solve authentic climate change problems.

*subject to CUAP approval.
